DEPARTMENT:	SALES

REPORTS TO:	SVP, Business Development, North America, West

THE FUTURE OF OFFICE SPACE TECHNOLOGY IS HERE

essensys is one of the fastest growing global proptech firms moving rapidly into our next stage of hypergrowth. Established in London in 2006, essensys was created to solve the complex operational, everyday challenges for flexible workspaces, the largest growing segment in the commercial office market.

We believe the office environment of the past is no longer - the staid and impersonal will be replaced with space-as-a-service and tech-oriented environment that has already attracted the world's largest enterprise users. Today, flex workspace accounts for less than 2% of the office space market and current growth estimates could easily reach 30% by 2030. Traditional landlords need to adapt and have already started doing so, especially in light of COVID. The opportunity is massive.

In 2019, essensys became a publicly traded company on the London Stock Exchange and currently has offices in London, NYC, LA and Toronto. We power over 20MM SF of space across 170+ cities.

WHAT WE DO

With our proven enterprise-ready office space technology, landlords can transform their buildings and their business. essensys is the global leader for delivering the digital services and office experiences that occupiers demand. We have built the only private cloud network to service the flexible workspace industry. We simplify the day-to-day management of flexible workspaces and the provisioning of secure wifi, internet and digital infrastructure services to tenants. Our platforms automate key tasks and processes and help landlords deliver highly efficient, customer-centric workspace solutions. Our partners include some of the largest landlords and flex operators in the world.
